D. C. WILSON, A. M., Ph. D.
Professor of Greek, Hampden-Sydney

M. R. LOUTHAN, B. A.
Asst. Professor of Mathematics, Bluefield

Other members to be appointed

GENERAL STATEMENT

The third summer session of Hampden-Sydney College, will be held at Bluefield College, Virginia-West Virginia, June 13 to August 12.

Hampden-Sydney is a standard, four year college, a member of the Southern Association of Colleges and Secondary Schools. Its graduates are accepted in the leading universities of the United States. The Summer Session is an integral part of the year's work and gives regular *residence credit* towards college degrees and teacher's certificates.

This nine week's session will enable students to get a full semester's credit in courses of study. Efforts will be made to arrange some six weeks courses for those whose specific needs can be met in that time. Such courses will begin on the opening date and end on July 22.

LOCATION AND CLIMATE

Bluefield College is 2600 feet above sea level. The campus lies just beyond the best residential suburb of Bluefield, West Virginia, a thriving city of 30,000 on the border of Virginia and West Virginia. The school thus enjoys the advantages of open mountain country, but with all the advantages of a modern city. The scenery is superb with mountains towering on every hand.

On the campus are clear mountain springs, two of them mineral springs, with abundant water supply. The buildings, modern and sanitary in every respect, are located on a fine elevation overlooking a fertile blue grass valley.

The air is pure and invigorating. The summer temperature moderate and cool at nights. The climate is unusually healthful, malaria and fevers practically unknown. The campus of 100 acres furnishes an ideal scenic and academic setting for a summer school.

Fine recreational facilities are offered. The campus adjoins the Bluefield country club. Bluefield College has its own tennis courts. Hikes into the surrounding country, into the mountain and trips to points of scenic interest will be organized for those who wish to go. Only actual expense will be charged.

Regular bus service is maintained between Bluefield College and the city of Bluefield, offering easy opportunity for shopping and amusements. The campus is also easily accessible by Virginia State Highway 128.

ADMISSION

Any student eligible to enter regular sessions of the colleges may be admitted to the summer session. Teachers holding a Virginia or West Virginia certificate or equivalent from other states will be admitted on this basis. Due consideration will be given the application for admission of mature students who may profit by the summer school courses.

The management reserves the right to ask the withdrawal of any student when this seems best for all concerned.

Students who have attended other colleges and desire to become candidates for degrees in either Hampden-Sydney or Bluefield College should send a transcript of their records, to the registrar of the college of their choice before the opening of the summer session.

EXPENSES FOR NINE WEEKS

Tuition (nine semester hours)	\$30.00
(Additional hour \$5.00)	
Registration	5.00
Laboratory fees:	
Biology	7.00
Chemistry	10.00
Physics	7.00

For those who attend only six weeks the tuition will be \$25.00, other fees being the same.

ALL FEES MUST BE PAID BEFORE REGISTRATION IS COMPLETE.

Bluefield College will furnish room and board to a limited number of students at \$7.00 per week. Application for room, with a deposit of \$5.00, should be made to Bluefield College. Students should bring bed linen, *blankets*, etc. Accommodations may be obtained in private homes in Bluefield.

CLASS ATTENDANCE, CREDIT AND GRADES

To receive full credit for courses, students must register not later than June 15. Failure to attend 95 per cent of classes in a course may result in a reduction in credit for the course.

The passing grade is 75. Students who grade is between 60 and 74 will be permitted to secure credit by special examination or otherwise.

Each 3 hour course meets five times a week; other courses in proportion.

All credits are in semester hours.

Students may not register for more than 9 hours except by special permission.

ASSEMBLY

An assembly period is held each Wednesday from 10:45 to 11:10. **ALL** students are expected to be present. Visiting speakers will address these gatherings of students and faculty.

***COURSES OF INSTRUCTION**

BIOLOGY

Biol. 1-2 *General Biology*—A study of living matter, its properties and behavior; representative plants and animals; biological problems. (6 hrs.)

Biol. 7. *Genetics*—A study of the fundamental principles of variation and heredity as applied to plants and animals. Lectures and problems. (2 hrs.)

CHEMISTRY

Chem. 1-2 *General Chemistry*—A study of the fundamanetal ideas of chemical science. (8 hrs.)

Chem. 3s. *Qualitative Analysis*—A study of the cations. Unknowns analyzed (3 hrs.) June 13 to July 13.

Chem. 4. *Organic Chemistry*—Recitations studying the important compounds of aromatic and aliphatic series. (6 hrs.)

Chem. 5. *Organic Chemistry*—Laboratory preparation of typical compounds (2 hrs.)

Chem. 6s. *Quantitative Analysis*—Gravimetric and volumetric. (3 hrs.) July 14 to August 12.

ECONOMICS

Economics 1 a and b. *General Economics*—The first parts of the course center in the elements of economics, the second in such problems as labor vs. capital, agriculture, transportation and public finance. (6 hrs.)
